Staff and unit personnel of all Soviet Intelligence and security agencies in Austria are subjected to continual indoctrination in the form of political lectures. According to General KURASOV's wishers in 1947 at least one 10 hour day each week is devoted to drill, ; political indoctrination and intelligence specialities.

Communist indoctrination and training centers have been identified in Gasden, Moedling, Kaltenleutgeben, Baden, Gaenserdorf, Hinter-Bruehl, St. Poelten, Weiner Neustadt and Eisenstadt. Reports frequently mention MVD and MGB personnel as lecturers and as students. Intelligence and sabotage courses were often reported to have been given at these centers.

The overall training status of RIS personnel in Austria cannot be assessed. Replacements consist of an increasing degree of personnel schooled in the USSR or in the satellite countries.
